jMaestro Folder

This folder has a needed file, Untitled.mid that the program uses.

The **jMaestro.jar** is the deliverable that is my program.

The .mid Files are sample songs to see the functionality of the program

The .sf2 files are sound font files that the user can use for the program.

source contains all of the source code for the project

application.css – css for the application

BasicOpsTest.java The Main java file that does it all, the top level

Constants.java A file made for dynamically generated constants

Measurebar.css css for measurebar

MeasurePane.java the thing that handles the measure bar

MIDINoteBar.java each individual note

MIDINoteExtractor.java does the note extraction

MIDIPane.java is the class for a track

ZoomableScrollPane.java This allows for the zoomable scroll pane

How To Use.rtf This contains all info needed to make sure the program runs and how to actually use the program

Journals.pdf contains all the weekly updates

UIBackend.pdf is the promised file that explains how the UI interacts with back end

jMaestroMockUp.png Is the promised mock up for the program
